If caregivers have a choice

Lotus

Empowering safe transfers with comfort and control

5900 8200 / 8250 / 8270

Lotus active standup aid

The Lotus is an active standup aid designed for individuals who can still stand independently and possess sufficient core stability but may have difficulty walking or are unable to walk. Caregivers can safely and efficiently move the client after they have seated themselves on the Lotus.

The Lotus is intended for short transfers, such as moving from the bed to the toilet. Because the client assumes an active seated position, less effort is required to return to a standing position. Optimal comfort is provided for both the client and the caregiver.

The Lotus features swivelling seat components equipped with snap lock closure, comfortable lower leg support, and a leg spread function. The leg spread function allows the Lotus to be brought close to the client, enabling them to actively take a seat. The Lotus encourages the client to actively participate in transfers, which helps train muscles and promotes independence.

Ergonomic Use. Equipped with smart handles and two braked castors to simplify manoeuvrability, ensuring high stability on various surfaces and minimizing the strain on the caregiver's joints.

Reliable & Long-Lasting. Built for daily care and backed by a 60-month warranty, offering a dependable performance.

Antibacterial & Corrosion-Resistant. The antibacterial coating with silver-ion supports hygiene and infection control, while the corrosion-resistant frame with smooth surfaces ensures durability and easy cleaning.
