#### Manufacturer

Lopital Nederland B.V. Laarakkerweg 9 5061 JR Oisterwijk The Netherlands T +31 (0) 13 5239300 www.lopital.com info@lopital.nl

All of the aids produced by Lopital fulfil the following norms: MDR (EU) 2017/745, NEN-EN-ISO 14971, NEN-EN 12182, ISO17966, IEC60529, IEC60601-1, IEC60601-1-2, IEC6060-1-6, IEC62366, CAN/CSA-C22.2 60601-1, ANSI/AAMI ES60601-1, UNI-CEI-EN-ISO 13485, NEN-EN-ISO 9001, NEN-EN-ISO 14001

## Introduction

These instructions apply to all Lopital shower-toilet chairs, shower trolleys, dressing tables and rising aids.

Cleaning and disinfection of Lopital products is necessary to prevent any sources of contamination remaining on the product from being transferred. Products should therefore be cleaned and disinfected after use.

To maintain the warranty and expected life, it is important to follow the recommendations in this protocol. This protocol describes detailed cleaning and disinfection procedures for Lopital products. The instructions in this protocol do not replace the cleaning and disinfection policy of your institution.

This protocol is only intended for persons who use Lopital products or who take care of cleaning, disinfection and maintenance of the products. Failure to follow these instructions can lead to serious damage to the products and/or invisible defects.

Lopital recommends cleaning and disinfecting the products before first use.

Lopital recommends cleaning and disinfecting the products when they are disposed of as waste. All parts that are replaced or removed can be returned to Lopital. It is also possible to offer these parts to the technician for destruction. We will ensure that all parts are processed in an environmentally friendly manner.

Lopital products are constantly undergoing further development. We therefore reserve the right to change products without prior notice. Lopital only offers express written warranty on the sale of products.

Information in this protocol is subject to change without notice. Please visit our website for the most current version of this protocol or contact your Lopital account manager for advice and further information.

Safety advice

- When cleaning, wear appropriate protective equipment according to the manufacturer's instructions and your institution's protocols, such as: rubber gloves, goggles, apron, face mask, and shoe protection.
- Before cleaning and disinfecting, unplug the product if applicable.
- Never clean the electric and hydraulic powered products by pouring water on them.
- Never use a steam cleaner for cleaning.
- Read the manufacturer's recommendations for cleaning and disinfecting the products.

#### Insufficient cleaning and disinfection increases the risk of cross-contamination!

Chemical class	Active component	рН	Cleaning agents/Disinfectants*	Manufacturer	Must not be used on the following parts:
Quaternary ammonium chloride	Didecyl dimethylammoniumchloride = 8.704% Alkyldimethylbenzylammoniumchloride = 8.19%	9.0-10.0 during use	Virex II (256)	Johnson/Diversey	Foot board of the Lotus rising aid and stretcher board of the Marina/Luxal/ Sirocco shower trolley
Quaternary ammonium chloride	Alkyldimethylbenzylammoniumchloride = 13.238% Alkyldimethylbenzylammoniumchloride = 13.238%	9.5 during use	HB Quat 25L	3M	
Accelerated hydrogen peroxide	Hydrogen peroxide 0.1-1.5% Benzyl Alcohol: 1-5% Hydrogen peroxide 0.1-1.5% Benzyl Alcohol: 1-5%	3	Oxivie Tb	Johnson/Diversey	Calf straps of shower-toilet chairs.
Phenolic	Orthophenylphenol = 3.40% Orthobenzyl parachlorophenol = 3.03	3.1 +/- 0.4 during use	Wexcide	Wexford Labs	
Chlorine	Sodium hypochlorite max. 1000 ppm	12.2	Dispatch	Caltech	Calf straps of shower-toilet chairs.
Alcohol	Isopropyl alcohol = 70%	5.0-7.0	Viraguard	Veridien	Hand controls of all products if applicable
Benzyl-C12-18- alkyldimethylamm onium chlorides	Benzyl-C12-18-alkyldimethylammonium chlorides (22%) 2-phenoxyethanol (20%) Tridecyl polyethylenglycol ether (15%) Propan-2-ol (8%)	approx. 8.6 during use	Terralin Protect	Shülke	Foot board of the Lotus rising aid and stretcher board of the Marina/Luxal/Sirocco shower trolley
Organic peroxide (type E, solid)	Magnesium monoperoxifalate hexahydrate (50- 100%) Anionic surfactant (5-10%) Nonionic surfactant (1-10%)	5.3 during use	Dismozone plus	Bode	Calf straps of shower-toilet chairs
Ethanol	Hydrogen peroxide (2.5-10%) Lauryldimethylamine oxide (0-2.5%) Ethanol (2.5-10%)	7	Anioxy Spray WS	Anios	Control box of the Luxal, Marina, Sirocco, Amfora, Vienna
Troclosene sodium	Adipic acid 10-30% Amorphous silicon < 1% Sodium toluenesulphonate 5-10% Troclosene sodium 10-30%	4-6 during use	Chlor-Clean	Guest Medical Ltd	Calf straps of shower-toilet chairs

# Applying Common Cleaning/disinfectants to Lopital Products

## Recommendations for cleaning and disinfection

To avoid the risk of contamination, all parts must be cleaned and disinfected after use.

All necessary precautions should be taken to remove all stains and dirt.

The cleaning and disinfection method described on the following pages applies specifically to Lopital products and accessories. This method is designed to save time and prevent infections more efficiently.

#### Equipment:

- When cleaning, wear appropriate protective equipment (such as rubber gloves, goggles, apron, face mask, and shoe protection) according to the manufacturer's instructions and your institution's protocols.
- Clean buckets
- Cleaning cloths for cleaning and drying
- Soft brush
- Warm water
- To find cleaning/disinfecting agents that may or may not be compatible with Lopital products, follow the instructions in "Applying Common Cleaning/Disinfectants to Lopital Products" on page 3 of this document.

## Instructions by product

## Nemo - Shower-toilet Chair 51005100

The Nemo must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material. Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Nemo may only be carried out by authorised personnel.

Maintenance schedule	
After every use	<ul> <li>Clean chair with water and regular household cleaning products (see next page).</li> <li>PUR foam components must be cleaned and disinfected.</li> <li>Check to ensure all parts of the Nemo are present, including the footrests, the head support and the seat filler piece.</li> </ul>
Weekly	<ul> <li>Check wheels for hairs, dus tand soap residues and remove if necessary.</li> <li>Check that the chair is still working correctly.</li> </ul>
Annually	<ul> <li>According to the medical devices regulation MDR (EU) 2017/745 a chair must be maintained in line with manufacturer's instructions.</li> </ul>

#### Cleaning

- 1. Clean the seat with a damp cloth with warm water and an institution-approved neutral detergent. A soft brush can be used to remove stains and stubborn dirt.
- 2. Wipe the entire chair from top to bottom. Do not use a dripping wet cloth. For easy access to all parts of the seat, adjust the seat to both the upright and reclined position.
- 3. Pay extra attention to the following surfaces:
  - Backrest
  - Seat (also underside)
  - Seat cover
  - Headrest
  - Calf support
  - Footrests
  - Armrests
  - Handles
  - Bedpan guides
  - Wheels

You can also use a cleaning unit/cleaning system to clean your chair. The temperature in the system should be a maximum of 55°C.

#### Disinfecting

- 4. Repeat the cleaning protocol Cleaning after reading "Application of common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the chair, wipe the chair with a damp cloth and clean water to remove any residue from the disinfectant.

#### The bedpan should be cleaned and disinfected in a bedpan washer after use.

# Flexo - Shower-toilet chair 51005199

The Flexo must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material. Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Flexo may only be carried out by authorised personnel.

Maintenance schedule	
After every use	<ul> <li>Clean chair with water and regular household cleaning products (see next page).</li> <li>PUR foam components must be cleaned and disinfected.</li> <li>Check to ensure all parts of the Flexo are present, including the footrests and the seat filler piece.</li> </ul>
Weekly	<ul> <li>Check wheels for hairs, dus tand soap residues and remove if necessary.</li> <li>Check that the chair is still working correctly.</li> </ul>
Annually <b>Volume 1</b> <b>Volume </b>	<ul> <li>According to the medical devices regulation MDR (EU) 2017/745 a chair must be maintained in line with manufacturer's instructions. This process will preferably be carried out by Lopital or another authorised body. Lopital offers the option of having the chair thoroughly inspected and serviced once a year via Periodic Preventative Maintenance.</li> <li>For more information about the maintenance contract, please contact Lopital (info@lopital.nl) or speak to your supplier.</li> </ul>

#### <u>Cleaning</u>

- 1. Clean the seat with a damp cloth with warm water and an institution-approved neutral detergent. A soft brush can be used to remove stains and stubborn dirt.
- 2. Wipe the entire chair from top to bottom. Do not use a dripping wet cloth. For easy access to all parts of the seat, adjust the seat to both the upright and reclined position.
- 3. Pay extra attention to the following surfaces:
  - Backrest
  - Seat (also underside)
  - Seat cover
  - Calf support
  - Footrests
  - Armrests
  - Handles
  - Bedpan guides
  - Wheels

You can also use a cleaning unit/cleaning system to clean your chair. The temperature in the system should be a maximum of 55°C.

#### **Disinfecting**

- 4. Repeat the cleaning protocol Cleaning after reading "Application of common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the chair, wipe the chair with a damp cloth and clean water to remove any residue from the disinfectant.

#### The bedpan should be cleaned and disinfected in a bedpan washer after use.

# Elexo – Shower-toilet chair 51005500

The Elexo must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material. Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Elexo may only be carried out by authorised personnel.

You can also use a cleaning unit/cleaning system to clean your chair. The temperature in the system should be a maximum of 55°C.

#### Disinfecting

- 4. Repeat the cleaning protocol Cleaning after reading "Applying common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the chair, wipe the chair with a damp cloth and clean water to remove any residue from the disinfectant.

#### The bedpan should be cleaned and disinfected in a bedpan washer after use.

## Timo - Shower(-toilet) chair

#### 54006020, 54006021, 54006024, 54006030, 54006034, 54006035

The Timo must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material. Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Timo may only be carried out by authorised personnel.

Maintenance schedule	
After every use	<ul> <li>Clean chair with water and regular household cleaning products (see next page).</li> <li>PUR foam components must be cleaned and disinfected.</li> <li>Check to ensure all parts of the Timo are present, including the footrests and removable seat.</li> </ul>
Weekly	<ul> <li>Check wheels for hairs, dus tand soap residues and remove if necessary.</li> <li>Check that the chair is still working correctly.</li> </ul>
Annually	<ul> <li>According to the medical devices regulation MDR (EU) 2017/745 a chair must be maintained in line with manufacturer's instructions.</li> </ul>

#### <u>Cleaning</u>

- 1. Clean the seat with a damp cloth with warm water and an institution-approved neutral detergent. A soft brush can be used to remove stains and stubborn dirt.
- 2. Wipe the entire chair from top to bottom. Do not use a dripping wet cloth.
- 3. Pay extra attention to the following surfaces:
  - Backrest
  - Seat (also underside, the seat is removable)
  - Footrests
  - Armrests
  - Handles
  - Bedpan guides
  - Wheels

You can also use a cleaning unit/cleaning system to clean your chair. The temperature in the system should be a maximum of 55°C.

#### Disinfecting

- 4. Repeat the cleaning protocol Cleaning after reading "Applying common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the chair, wipe the chair with a damp cloth and clean water to remove any residue from the disinfectant.

#### The bedpan should be cleaned and disinfected in a bedpan washer after use.

## Cleo - Shower(-toilet) chair

54006040, 54006050

The Cleo must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material. Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Cleo may only be carried out by authorised personnel.

Maintenance schedule	
After every use	<ul> <li>Clean chair with water and regular household cleaning products (see next page).</li> <li>PUR foam components must be cleaned and disinfected.</li> <li>Check to ensure all parts of the Cleo are present, including the footrests and removable seat.</li> </ul>

#### <u>Cleaning</u>

- 1. Clean the trolley with a damp cloth with warm water and an institution-approved neutral detergent. A soft brush can be used to remove stains and stubborn dirt.
- 2. Wipe the entire trolley from top to bottom. Do not use a dripping wet cloth. For easy access to all parts of the trolley, adjust the trolley to both the highest and lowest position.
- 3. Pay extra attention to the following surfaces:
  - Mattress
  - Pillow
  - Stretcher board
  - Side rails
  - Head and foot ends
  - Manual control
  - Brake pedals
  - Wheels

You can also use a cleaning unit/cleaning system to clean your trolley. The temperature in the system should be a maximum of 55°C.

#### **Disinfecting**

- 4. Repeat the cleaning protocol Cleaning after reading "Applying common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the trolley, wipe the trolley with a damp cloth and clean water to remove any residue from the disinfectant.

### Lotus – Rising aid 59008100

The Lotus must be cleaned after every use, with water and regular household cleaning agents. PUR integrated foam components with IMC coating should be rubbed clean and disinfected. Do not use any abrasive or other aggressive cleaning products. If necessary, the PUR components can be disinfected with a solution of 70% ethanol or propanol.

The time the products must be left on the components has a significant impact upon the lifespan of the PUR components. As a result of the material properties of PUR, contact with sharp objects must be avoided. This could lead to damage or tears in the material.

Finally, we would like to point out that non-critical parts of the PUR components must also be cleaned and disinfected.

Check the wheels regularly for hairs, dust and soap residues and remove when necessary. Maintenance and repairs to the Lotus may only be carried out by authorised personnel.

Maintenance schedule	
After every use	<ul> <li>Clean the Lotus with water and regular household cleaning products.</li> </ul>
Weekly	<ul> <li>Check wheels for hairs, dus tand soap residues and remove if necessary.</li> <li>Check that the trolley is still working correctly.</li> </ul>
Annually	<ul> <li>According to the medical devices regulation MDR (EU) 2017/745 the Lotus must be maintained in line with manufacturer's instructions.</li> </ul>

#### <u>Cleaning</u>

- 1. Clean the Lotus with a damp cloth with warm water and an institution-approved neutral detergent. A soft brush can be used to remove stains and stubborn dirt.
- 2. Wipe the entire Lotus from top to bottom. Do not use a dripping wet cloth. For easy access to all parts of the Lotus, adjust the legs to both the wide and narrow position.
- 3. Pay extra attention to the following surfaces:
  - Seat parts
  - Lower leg supports
  - Frame (especially where the user holds)
  - Handles
  - Foot plate
  - Pedals leg spread
  - Wheels

You can also use a cleaning unit/cleaning system to clean your chair. The temperature in the system should be a maximum of 55°C.

#### Disinfecting

- 4. Repeat the cleaning protocol Cleaning after reading "Applying common cleaning/disinfectants to Lopital products" on page 3 of this document. Follow the manufacturer's directions for proper use of the disinfectant.
- 5. After disinfecting the Lotus, wipe the Lotus with a damp cloth and clean water to remove any residue from the disinfectant.
